**Engine Types:** 1 = single, I = inline, V = Vee, O = opposed, number (1, 2 etc.) indicates no. of cylinders. **n/a:** not available. **Hp and torque:** as measured on the Cycle City and Spectrum Motorsports dynamometers, Irvine, CA, corrected for temperature and barometric pressure. 1/4-mile times and mph, measured by Stalker radar, are corrected for altitude and barometric pressure. **Braking 60-0** is the best number obtained from as many tests as required to satisfy our test riders. **Interpretation:** data are gathered at the same test site, but on different days, and can be influenced by temperature, barometric pressure, humidity, winds or the pavement condition. As a result, small differences would be expected on different days. **Significant performance differences** outside this normal variation are as follows: Acceleration: 0-60 mph: 0.2 sec.; 0-100 mph: 0.3 sec.; quarter-mile: 0.3 sec. Top speed: 3 mph.; Braking 60-0 mph: 4'; Rear wheel horsepower: 3 hp.; Torque: 2 lb./ft. **Bolded numbers** are the best and worst in each performance category. **Ratings** of individual bikes should only be compared within similar categories.
