

## Winter 2004/2005 Edition

**W**ELCOME TO THE MCN "Used Bike Value Guide." The manufacturers and models are listed alphabetically, from the smallest displacement engines to the largest, in two categories: "On/Off Road" and "Street." "On/Off Road" motorcycles are those equipped to be used effectively off the pavement as well as on, and that come stock with the necessary lighting, etc., to meet applicable state laws. "Street" bikes include all motorcycles which are street legal and meant to be used on pavement only. Please note that in order to keep this guide to a manageable length, in some cases we have used a "shorthand" method of listing only the basic model when slight variations of that model exist.

The prices given are for the *full retail value* of a stock motorcycle. This price best represents either a reconditioned or clean, undamaged and well-maintained vehicle ready to be sold publicly by a dealer or privately between individuals. You should, however,

remember that the value assigned is a national average and may not reflect regional trends for certain vehicles.

All of the values published in this "Used Bike Value Guide" are intended to be used as a guide only, and are determined by evaluating sources the publisher believes to be accurate. In certain cases, an extremely clean or low-mileage example of a vehicle will command a higher market value than what is indicated here. Certain higher-priced aftermarket additions may also increase the value. By the same token, bikes with high mileage, body damage or evidence of abuse or lack of maintenance will command lower market values.

Though considerable care has been exercised to ensure the accuracy of these values and specifications, neither N.A.D.A. Appraisal Guides or MCN assumes responsibility for any errors or omissions.

For a complete breakdown of the value and specifications of any particular motorcycle, MCN highly recommends subscribing to the *N.A.D.A. Consumer Motorcycle/Snowmobile/ATV/Personal Watercraft Appraisal Guide* (888-232-6232).
